- “WE GET INTO A PROJECT AND WE FIND WE HAVE INSUFFICIENT RESOURCES”
- “WE HAVE GOOD PROJECT IDEAS BUT LACK A SOLID PROJECT PLAN TO EXECUTE”
- “WE HAVE POOR COMMUNICATION, WHICH CAUSES LACK OF INPUT AND ORGANIZATION”
- “AS LEADERS, WE ARE GOOD, BUT NEED BETTER WAY TO MANAGE PROJECTS AND COSTS”

BENEFITS

- Project tracking from Start to Finish; nothing falls through the cracks
- Dynamic updates with project profitability tracking
- Expedited updates and corrections when a challenge occurs
- Formal project management identifies which project(s) are successful, and which need to be halted or modified because they are losing money
- The detail of a project may be different, but operating method is the same on all projects. Every project has a *concept, plan, execute, and closeout phase*
- 33% or all project finish on-time and on budget, this can be increased with this structured process
